

About the Tutorial

ASP.NET is a web application framework developed by Microsoft to create dynamic web sites. It allows you to use a full-featured programming language such as C# or VB.NET to build web applications easily.

This tutorial covers all the basic and advanced level of ASP.NET topics that will be useful to create asp.net dynamic web sites.

Audience

This tutorial is prepared for the beginners as well as experienced to help them understand basic and advanced level of ASP.NET programming. In this tutorial we will cover all of the topics which come under asp.net programming language from basic level to advanced level. After completing this tutorial, we will work on a live project and after completion of the live project we will have a presentation on the project and based on that will have a Q&A session.

After completion of the project we will see asp.net interview questions so it will be helpful at the time of interview.

Prerequisites

Before proceeding with this tutorial, we should have a basic knowledge of .NET programming language like C# or vb.net. As we are going to work with asp.net so it will be good if we have basic knowledge on client-side application such as HTML, jQuery, JavaScript, CSS, AJAX, etc.

Note: We will get the basic understanding on the technologies which are required to create a dynamic asp.net website as per this tutorial.

Contents

About the Tutorial.....	
Audience	
Prerequisites	
Disclaimer & Copyright.....	
Contents.....	
1. INTRODUCTION.....	
What is ASP.NET?	
ASP.Net Architecture and Component.....	
ASP.NET Web Forms Model	
What is server side and Client-Side technology.....	
.NetFramework.....	
What is C# and vb.net.....	
2. ENVIRONMENT SETUP	
Installing The Visual Studio	
Creating a sample Projects	
Building and Running a Project.....	
Asp.net project folder structure knowledge.....	
3. LIFECYCLE.....	
ASP.NET Application Life Cycle.....	
ASP.NET Page Life Cycle	
ASP.NET Page Life Cycle Events.....	

Debugging knowledge

4. Basic knowledge on client-side application.....

5. Basic knowledge on C# and Oops.....

6. Asp.net First application.....

Adding control to project and checking the behavior of website.....

7. Knowledge on IIS Server

Basic understanding on IIS

Run asp.net application on IIS

8. Understanding on different type of control provide by asp.net framework

Button Controls

Text Boxes and Labels.....

Check Boxes and Radio Buttons.....

List Controls.....

The ListItemCollection Object.....

Radio Button list and Check Box List.....

Bulleter lists and Numbered Lists

HyperLink Control.....

Image Control.....

- 9. SERVER CONTROLS.....**
 - Properties of the Server Controls
 - Methods of the Server Controls
- 10. VALIDATORS.....**
 - BaseValidator Class.....
 - RequiredFieldValidator Control
 - RangeValidator Control.....
 - CompareValidator Control.....
 - RegularExpressionValidator
 - CustomValidator
 - ValidationSummary.....
 - Validation Groups
- 11. Session management technique in Asp.net**
 - Session.....
 - Cookies.....
 - Query String.....
 - View state
 - Application state.....
- 12. EVENT HANDLING in asp.net.....**
 - Event Arguments.....
 - Application and Session Events.....

<https://virtualassets.in/>

- Page and Control Events.....
- Event Handling Using Controls.....
- DefaultEvents.....
- 13. CLIENT SIDE coding for asp.net controls.....**
 - Client Side Scripts
 - Client Side Source Code
- 14. DIRECTIVES.....**
 - The Application Directive
 - The Assembly Directive
 - The Control Directive.....
 - The Implements Directive.....
 - The Import Directive.....
 - The Master Directive
 - The MasterType Directive.....
 - The OutputCache Directive.....
 - The Page Directive.....
 - The PreviousPageType Directive.....
 - The Reference Directive.....
 - The Register Directive
- 15. DATABASE**
 - Installation SQL server
 - Basic knowledge on sql server.....
 - Database query on sql server

<https://virtualassets.in/>

- 16. ADO.NET**
 - The DataSet Class
 - The DataTableClass.....
 - The DataRow Class
 - The DataAdapter Object
 - The DataReader Object.....
 - DbCommand and DbConnection Objects

- 17. DATA SOURCES**
 - Data Source Views.....
 - The SqlDataSource Control
 - The ObjectDataSource Control.....
 - The AccessDataSource Control.....

- 18. DATA BINDING.....**
 - Simple Data Binding.....
 - Declarative Data Binding.....

- 19. Asp.net GridView.....**
 - Basic Gridview knowledge.....
 - Nested GridView knowledge.....
 - Bind Gridview with database.....

- 20. FILE UPLOADING**

- 21. AD ROTATORS**
 - The Advertisement File

<https://virtualassets.in/>

- Properties and Events of the AdRotator Class.....
- Working with AdRotator Control.....
- 22. CALENDARS**
- Properties and Events of the Calendar Control.....
- Working with the Calendar Control.....
- 23. MULTI VIEWS.....**
- Properties of View and MultiView Controls.....
- 24. PANEL CONTROLS**
- Working with the Panel Control.....
- 25. AJAX CONTROLS**
- The ScriptManager Control.....
- The UpdatePanel Control
- The UpdateProgress Control.....
- The Timer Control.....
- 26. CUSTOM CONTROLS**
- User Controls.....
- Custom Controls.....
- Working with Custom Controls.....
- 27. ERROR HANDLING**
- Tracing.....
- Error Handling.....

<https://virtualassets.in/>

- 28. **SECURITY for Website**.....
 - Forms-Based Authentication.....
 - IIS Authentication: SSL
- 29. **DATA CACHING**.....
 - What is Caching?.....
 - Caching in ASP.NET
 - Output Caching
 - Data Caching
 - Object Caching.....
- 30. **Live project in asp.net dynamic website (Available with Training)**
- 31. **Discussion on live project (Available with Training)**
- 32. **Interview question practice. (Available with Training)**
- 33. **Face to Face Interview schedule for student's confidence with interview panel. (Available with Training)**
